

2/12/04

We at Ryan Family Amusements operate five bowling centers in all. Three years ago we lost our head pinsetter mechanic to illness. We had some experienced pin chasers but that was all they were was pin chasers. Stops and break downs started to take its toll. We contracted Clint Cutler of Bowling Repair Services after him being referred to us. Since his regular maintenance program started our Tenpin and Candlepin machines have never run so well. Clint's hands on training of our pinsetter staff have been a huge plus, not to mention his availability by phone to talk us through a machine problem.

At this time I can say having Clint's services has only made our centers run better and have helped produce higher revenues and lower payroll along with lower operating expenses.
